Ode to Joy back story: Beethoven was completely deaf when he embarked on this masterpiece, and it's a tragedy that he never heard a single note of it except inside his head. At the end of the symphony's first performance the German composer, who had been directing the piece and was consequently facing the orchestra, had to be turned around by the contralto Caroline Unger so that he could see the audience's ecstatic reaction. Beethoven had been unaware of the tumultuous roars of applause behind him.

Even deaf, Beethoven celebrated the incredible beauty of connections on the Path of Joy with this music.
